The 2000 series are a range of versatile, hand held digital thermometers.

Each model comes with an easy to read LCD display featuring '°C', 'hold', 'open circuit', and 'low battery' indication.

The thermocouple probe socket is located at the front of the instrument. It allows a wide range of interchangeable thermocouple type 'K' probes to be connected to the thermometers. These meters are supplied with one probe.

Three different models available, that measure temperature over the range of -49.9 to +1000°C.
