### Model Specification

| Manufacturer | Nominal Size | Flow Range              |
|--------------|--------------|-------------------------|
| Cussons      | 2"           | 2-40<br>litres/second   |
| Cussons      | 4"           | 10-100<br>litres/second |
| Meriam       | 4"           | 30-200<br>litres/second |
| Other        | 6"           | 40-400<br>litres/second |

A range of laminar flowmeters for airflow measurement are available covering 0-400 litres/second flow range. Pressure differential devices are available if required. All meters come with a clean filter, calibrated across the required flow range.

### Applications:

- Combustion Airflow to internal combustion engines,
- Fan and blower calibration
- Leak Testing
- Automobile component testing
- For calibration of flow metering devices e.g. Variable Area Meters, Orifices, nozzles, etc.
